CAREER OBJECTIVE

Information Assurance student with hands-on experience in SOC operations, security monitoring, and log analysis. Seeking to develop as a Junior SOC Analyst, with a focus on SIEM monitoring, alert triage, incident investigation, and improving detection and response processes.

EDUCATION

FPT University 10/2022 - Present

Major: **Information Assurance**

Cumulative GPA: **3.2 / 4.0**

WORK EXPERIENCE

FPT Software, SAS Department 02/20226 - 05/2026

Security Analyst Intern (SOC)

- Completed SOC training through multiple hands-on labs covering Network Forensics, Endpoint Forensics, Threat Hunting, Cloud Forensics, and Threat Intelligence.
- Gained practical experience in querying, filtering, and analyzing logs in Splunk and ELK from various data sources, including Windows Event Logs, Sysmon, AWS CloudTrail, Zeek/Suricata, and system logs.
- Developed strong hands-on skills in PCAP analysis using Wireshark to identify attacker IPs, attack flows, suspicious HTTP requests, web shells, C2 traffic, credential leakage, and web exploitation indicators.
- Practiced memory dump and system artifact analysis using Volatility, MemProcFS, Event Logs, and Sysmon Logs to detect malicious processes, command lines, persistence mechanisms, defense evasion techniques, and related IOCs.
- Familiar with threat intelligence platforms such as VirusTotal, MalwareBazaar, ANY.RUN, and OSINT sources to investigate hashes, IPs, domains, malware families, TTPs, and map attacker behaviors to MITRE ATT&CK.

CSP Technology and Solutions JSC 01/2025 - 04/2025

Security Intern (WAF)

- Assisted in configuring and managing **Web Application Firewall (CSP-WAF)** for internal web applications.
- Built and tested detection rules for common web attacks, including **SQL Injection, XSS, Directory Traversal**, and other **OWASP Top 10** vulnerabilities using simulated attack scenarios.
- Analyzed WAF logs, identified **false positives / false negatives**, and fine-tuned rules to improve detection accuracy while minimizing impact on legitimate users.

PERSONAL PROJECTS

Home SOC Mini Lab – Web & Firewall Monitoring | *Splunk, FortiGate, Ubuntu Web Server* 08/2025 - 10/2025

Web and Firewall Log Monitoring with Splunk

- Built a DMZ-based lab, forwarded web/firewall logs to Splunk, and analyzed source IPs, attack timelines, attack vectors, and impact levels.

SOC Lab with OpenVAS Integration | *Splunk, OpenVAS* 09/2025 - 11/2025

Integrating SOC with OpenVAS for Vulnerability Monitoring

- Integrated OpenVAS scan results into Splunk dashboards to track CVEs, severity, affected hosts, risk prioritization, and remediation actions.

SKILLS

Security	**SIEM & Log Analysis:** Splunk, ELK, Wazuh, Windows Event Log, Sysmon, AWS CloudTrail **Forensics & Investigation:** Wireshark, Volatility, FTK Imager, Process Monitor, NetworkMiner **Threat Intelligence:** VirusTotal, MalwareBazaar, ANY.RUN, OSINT, MITRE ATT&CK **Network Security:** FortiGate, pfSense, OpenVAS, DMZ, Firewall Log Analysis
OS & Scripting	Windows, Windows Server, Linux, Kali Linux, Python, Bash, C

CERTIFICATE

CCNAv7: Introduction to Networks – (Cisco Networking Academy) 11/2023

ISC2 Systems Security Certified Practitioner (SSCP) Specialization – (ISC2, Coursera) 05/2025
